SAFE AND SMART CHARGING

BATTERY CHARGERS & MAINTAINERS

The DB line models are compact and easy-to-use battery chargers and maintainers designed to meet every need.

Thanks to intelligent charging technology, they allow you to recharge the battery in complete safety, keeping it always charged and ready for use. The three available models are **compatible with most batteries on the market**.

The DB line is ideal for charging and maintaining the batteries of: garden equipment, motorcycles and scooters, classic cars, SUVs, commercial vehicles, agricultural machinery, boats, trucks, and industrial vehicles.

DB 4 and DB 8 feature an **equalization** function that recalibrates the acid concentration between the battery cells, balancing the charge and extending the service life.

Mounting system

The accessories shown are included with all models.

KEY FEATURES OF OUR BATTERY CHARGERS

Compatible with multiple battery types: Pb, WET, EFB, MF, Ca/Ca, AGM, GEL, Start & Stop

Automatic restart: after a power interruption, charging resumes automatically.

Safe operation: protection against reverse polarity, short circuit, and overheating.

IP65

Splash resistant: protected against dust and resistant to water splashes.

MM

Pulse maintenance mode: prevents deep discharge, keeps the battery fully charged and maximizes reliability and lifespan.
